(54) Title: **NUCLEIC ACID COATED PARTICLES**

(57) Abstract: Particles are provided which are suitable for delivery from a particle-mediated delivery device. The particles are obtained by precipitating a nucleic acid on inert metal carrier particles in the presence of a nucleic acid condensing agent and a metal ion chelating agent. Also described are processes for preparing the particles, and therapeutic methods using the particles including methods of nucleic acid immunisation and gene therapy.
